Dialogue: Audi QR codes

Experience Audi even more directly: download a QR app to your smartphone and scan the QR code or use the given link provided in your browser.

The equipment for the vehicles illustrated in the Fascination section can be found on page 86. The fuel consumption and CO₂ emission figures can be found from page 76 onwards.

In an instant, form becomes fascination.

A brief moment. The blink of an eye. Sometimes that's as long as it takes to arouse enthusiasm. One glance at the Audi A5 Sportback is enough to sense that this is one of those moments. A coupé – completely reinterpreted. And a character that lets you experience in the first few metres that every moment is special.

The fuel consumption and CO_2 emission figures can be found from page 76 onwards.

What kind of vehicle is this Audi A5 Sportback? A coupé? An Avant? This vehicle does not fit into familiar categories. It defines a class of its own – a five-door coupé. From the elongated, three-dimensionally carved bonnet through to the tail, the design echoes the classic form of a two-door. The sharp distinctive lines give the vehicle expression and stance. The flat roof is stretched elegantly over the frameless doors and a sporty shoulder line accentuates the large wheels. Short overhangs and a longer wheelbase create additional dynamics.

The elegant yet powerful roofline of the Audi A5 Sportback is rounded off by its smoothly accentuated tail. The rear lights are particularly fascinating: they are the optical link between the shoulder line at the side and the edge of the bumper. The horizontal lines of the rear bumper accentuate the decisiveness of the design, while the diffuser insert in a contrasting colour increases the dynamics. The front fog lights are enclosed by a black high-gloss blade. The optional xenon plus headlights with integrated LED daytime running light strip are particularly eye-catching. The Singleframe with its sculptural structure makes the vehicle look self-confident, while the elegant lines of the bonnet make the car lighter and sportier.

It only takes a millisecond for a normal driving situation to become a challenge. The best option is to detect dangerous situations early and thus avoid them if possible. The A5 Sportback has extensive assistance systems to help drivers with this. Audi active lane assist, which is available on request, for example, warns the driver if the vehicle is inadvertently drifting out of lane and gently intervenes in the steering if necessary, while the optional Audi side assist monitors the areas to the left, right and behind the vehicle and issues a warning during lane changing if there is a vehicle in the immediate vicinity in the adjacent lane.

Audi drive select lets you drive according to your mood – comfortably or sportily as you prefer. On request, the dynamic steering option can be ordered with the system; this adapts to the respective mode selected and ensures even smoother running or faster implementation of your steering commands.

The quattro permanent all-wheel drive sets standards in agility with wheel-selective torque distribution and a self-locking centre differential. The system transfers the drive force dynamically and asymmetrically to all four wheels depending on the individual situation – for outstanding traction. On request, you can experience even more precise cornering with the optional quattro with sport differential. The standard electromechanical power steering works according to speed and ensures greater steering precision and comfort. In addition, it only requires fuel if you actively request steering support.

Slimline optional xenon plus headlights with an LED daytime running light strip and large air inlets give the front of your A5 its typically expressive appearance. The brake light integrated into the tailgate emphasises the aesthetic design of the vehicle. Furthermore, its LED technology reacts more quickly than standard lamps, giving following road users more warning time when the car brakes.

The interior radiates elegance and sportiness. The architecture is harmonious and creates a lively atmosphere. Selected materials emphasise the high quality of workmanship, which you will see and above all feel.

High-quality steering wheels, a wide range of colours and refined chrome applications emphasise this feeling. The standard leather-covered sport steering wheel in 3-spoke design provides a good grip, as does the ergonomically shaped gear or selection lever knob, which is also leather-covered.

The optional MMI navigation plus is intuitively operated via the MMI button with integrated joystick or voice control. MMI navigation plus features include a high-quality 7-inch colour display with 3D map representation and a hard drive for your music and media data. In conjunction with Audi connect including car phone, you even have a separate Wi-Fi hotspot available. In addition, you can use a variety of services supported by Audi connect. More information about these features can be found on page 46 in the Audi connect section.

You get into a coupé – and are amazed by the generous amount of space in the Audi A5 Sportback. Experience the dimensions and superb details of the interior, with its well thought-out design. Four or an optional five seats offer comfort and strong lateral support. On request, you can also choose ventilated and heated climate-controlled comfort seats in the front. A host of seat upholstery designs adds diversity to the interior, and the fine Nappa leather offers even more seating comfort. Refined applications make the interior even more elegant: you can decide between high-quality polymer material in a reflex finish, aluminium or precious woods.

There is an exceptional amount of space in the back, too, for relaxed travelling, even on long journeys. The generous luggage compartment with a loading width of 1,000 mm is extremely variable. The asymmetrical rear seat can be split and folded down to allow the loading volume to be extended quickly from 480 to 1,283 litres. The optional through-loading facility with removable ski and snowboard bag facilitates the stowing of longer objects, so that you can relax and simply look forward to your next transport.

20 Audi ultra

Audi ultra on the podium: the Audi R18 ultra

Audi ultra:

Every gram less extends the lead.

Audi ultra, the pioneering lightweight technology from Audi, is more than just the sum of its individual components. It combines innovative materials, intelligent design principles and production processes that use resources sparingly into an overall concept. Many Audi ultra lightweight measures have already been implemented in the Audi A5 Sportback.

That starts with the body. The steel shell design of the Audi A5 Sportback combines low weight with high rigidity.

The design uses only as much material as necessary in the respectively right places. Thin metal panels made of hot and cold formed steel in the body structure are combined with lightweight but sturdy aluminium in the body plating on the

The aluminium components on the front and rear axle and the aluminium alloy wheels not only reduce the overall weight but also the unsprung masses, which in turn leads to a further increase in agility and driving comfort.

Drive technologies such as direct fuel injection and turbocharging have always made Audi in the Audi A5 Sportback produce more power with a smaller engine size, making them significantly lighter than the corresponding engines used in earlier model series.

Each lightweight component has an effect on other components, allowing their dimensions to be reduced as well. The result is a continuous

development process towards less and less weight and more and more efficiency. In figures: engines more powerful. The modern TFSI engines a vehicle that weighs 100 kg less can save up to 0.3 litres of fuel per 100 km.

The demands placed on modern vehicles are

contradictory. On the one hand, they must offer enhanced performance and comfort, on the other they need to be more economical and efficient. Audi ultra resolves this conflict by examining each and every component.

We demand the highest functionality combined with the lowest possible weight. The result is an intelligent mix of materials that even allows a reduction in engine size: lighter vehicles no longer need a large engine to be agile. In 2012, for instance the two Audi R18 e-tron quattros and the Audi R18 ultra that drove to podium finishes at Le Mans had V6 engines, whereas their victorious predecessor in 2010, the R15 TDI, had featured a V10 engine.

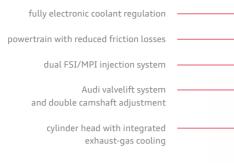

Hot-formed steel

Cold-formed steel

22 TFSI®

according to how much power the niection pressure is between 30 and

Many hours of development. Thousands of miles of testing. And for what reason?

In just a few seconds you will understand why.

The Audi A5 Sportback employs TFSI technology. And the remarkable thing about it is that it combines the advantages of FSI® turbocharger, which manual transmission. It accelerates from 0 to ensures even better power delivery. The TFSI engines you can choose from are all equipped with the economic start-stop system.

maximum torque of 320 Nm. It is one of the

most fuel-efficient engines of its class, with a fuel consumption of only 5.8 l per 100 km with 100 km/h in 8.2 seconds. The powerful 2.0 litre TFSI engine with its 165 kW will have you sprinting from 0 to 100 km/h in 6.5 seconds. Both engines already comply with the EU6

The 1.8 TFSI has 125 kW of power and a emission standard.

The fuel consumption and CO₂ emission figures can be found from page 76 onwards.

S engine:

More dynamics. More power.

The Audi A5 Sportback also features efficient TF- that switches the engine off automatically in SI technology on more powerful engines. It has a different standstill situations, and switches it on 3.0 litre V6 TFSI engine that generates a powerful 200 kW. An innovative mechanical driven supercharger system with intercooling is employed here and turns the 6-cylinder engine into a compact powerhouse with moderate fuel con-

again when the brake is released.

switchable water pump

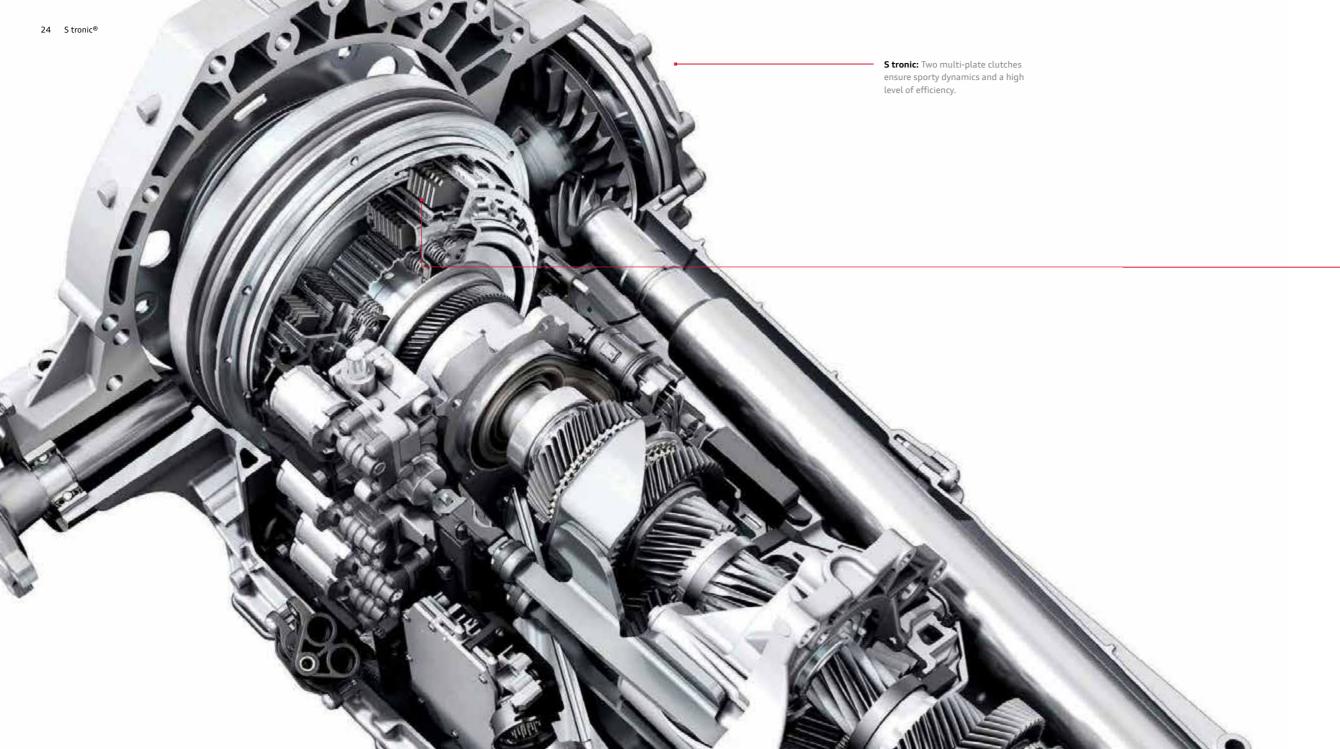

high-pressure pump

timing drive chain

integrated supercharger module

The peak torque of 400 Nm is sure to impress you, as will the torque curve, available across an engine speed range of 2,150 to 4,780 rpm. sumption. This is assisted by the start-stop system
Thanks to its spontaneous responsiveness and

exceptional power delivery across the entire engine speed range, the 6-cylinder engine promotes a particularly dynamic driving style. That way, it accelerates the A5 Sportback from 0 to 100 km/h in 6.0 seconds.

What is the benefit of two clutches?

A double saving: time and energy.

The 7-speed dual-clutch transmission enables rapid gear shifting with hardly any perceptible break in propulsive power and is therefore particularly efficient.

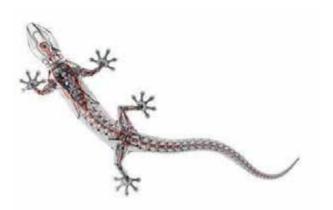

As long ago as 1985, Walter Röhrl tested this technology in the Sport quattro S1 – and was suitably impressed. Audi drivers share his enthusiasm to this day, because the modern S tronic changes gear in a flash. To do this, two multi-plate clutches serve the different gears. One large clutch transfers the torque via a solid drive shaft to the

gearwheels of the odd-numbered gears. A second clutch serves the even-numbered gears via a hollow shaft. Both parts of the transmission are permanently active, although there is only ever one actively connected to the engine via a closed clutch. For example, if the vehicle is accelerating in third gear, then the second part of the transmission is already engaged in fourth gear. The gear change happens very quickly through the change of clutches – the first clutch opens, whilst the second one closes. The gear change only takes a few hundredths of a second and is com-

pleted with virtually no interruption in the power flow. It runs so smoothly and comfortably that the driver barely notices it.

It does not matter whether the driver chooses the fully automatic modes with the programs D (Drive) or S (Sport) or, for example, changes gear manually with the shift paddles – the gear change feels precise and extremely sporty. Even with all of this dynamic technology, the S tronic still remains very efficient. Its high level of efficiency helps to reduce both fuel consumption and emissions.

26 quattro®

Why only use two wheels when a car has four?

The quattro® permanent all-wheel drive.

quattro is a permanent all-wheel drive. If the wheels on one axle of the vehicle lose grip on the road and threaten to spin, then the drive force is thus more safety. transferred to the other axle - automatically and permanently distributed through the centre differential. The basic distribution is 40:60 -40 % of the driving power comes from the front axle, 60 % from the rear. The benefit is better traction during acceleration and improved safety a normal physical process: a moving object due to exceptional grip. So much for the technology. But what makes quattro unique is really the driving feel. "As if you are stuck to the

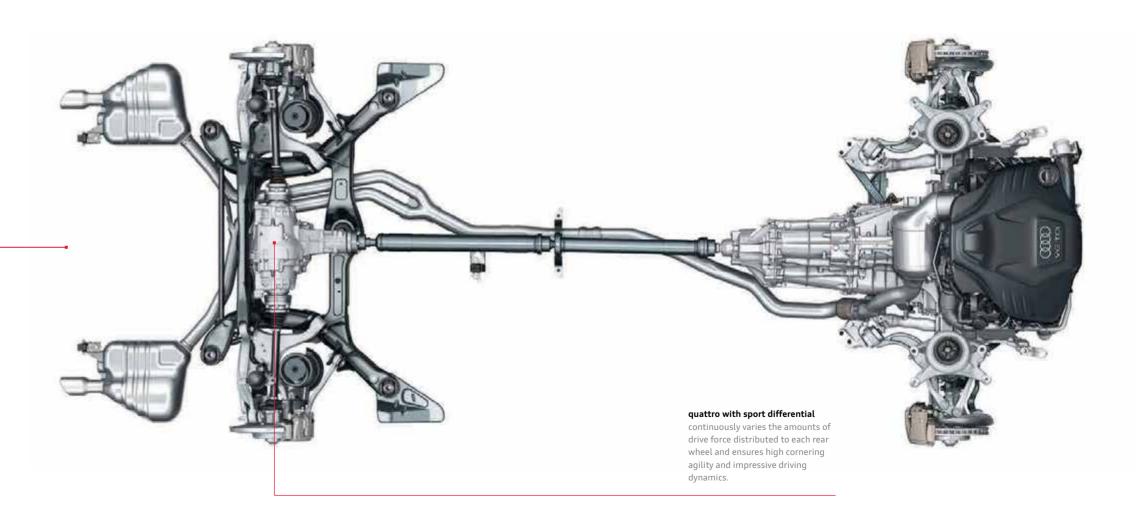

road," some customers say. We put it like this: quattro gives you a better feel for the road and

The optional quattro with sport differential further reinforces this unmistakeable quattro feeling. Vehicles tend to experience understeer when steering or driving into corners. This is opposes a change in direction. The elastic tyres and the suspension mounts tense up until the new direction has been adopted. When

accelerating into a corner, the load on the front axle is Depending, for example, on the steering angle, reduced and it therefore transfers less lateral force to the tyres - the vehicle understeers. With the sport differential on the rear axle, the tendency to understeer is largely counteracted.

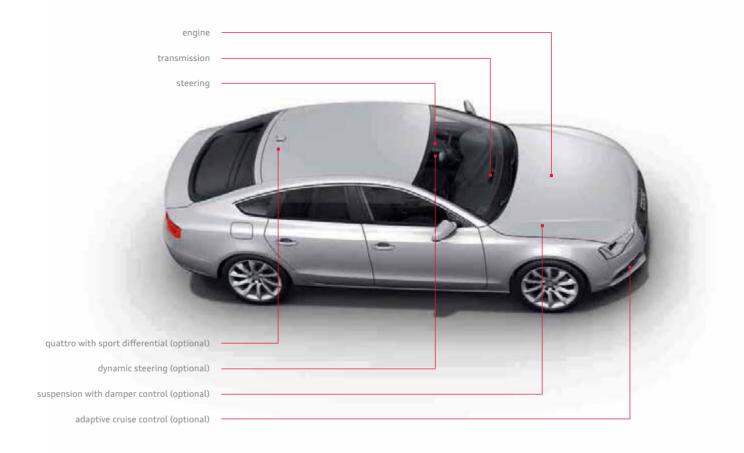

This is because the quattro rear axle differential has been extended left and right by a clutch system with two gear levels. They ensure that the infollows the angle of the front wheels. The dividual wheels on the rear axle receive different levels of torque. The clutches are activated by an electro-hydraulic actuator.

lateral acceleration, yaw angle and driving speed, the system calculates the right distribution of wheel torque for any driving situation. In this way the power is specifically channelled to the outer rear wheel, when steering or accelerating into a corner. The effect: the vehicle is effectively pressed into the corner by the drive force and variable left and right drive forces also help stabilise the steering and the usual steering corrections are hardly necessary.

Audi drive select.

Everybody defines driving dynamics differently. We a generally comfortable yet sporty driving define it like this: drive exactly how you feel. With the optional Audi drive select, you can influence individual vehicle components at the push of a button and so change the character of your Audi.

You have up to five modes to choose from: efficiency, comfort, auto, dynamic and, in conjunction with one of the optional MMI navigation systems, individual mode, allowing you to determine yourself how the associated vehicle components should behave. The comfort mode is especially suitable for providing the most relaxed driving possible on long journeys. The auto mode offers

experience. For particularly sporty driving, for example on winding roads, there is the dynamic mode. The efficiency mode, however, allows consumption-improved driving. As an integral component of Audi drive select it is characterised by energy-enhanced operation of the engine and secondary consumers such as the air conditioning, as well as changing the shift program in models with automatic transmission.

In every mode, the vehicle adjustments depend on the equipment present. Audi drive select affects the engine, automatic transmission and steering

as standard. Other features you can also influence - if fitted - include the suspension with damper control, the dynamic steering and the quattro with sport differential. The engine and gears react more spontaneously or in a more balanced manner to movements of the accelerator, depending on the mode chosen. Moreover, the engine speeds at which gear changes take place are varied in models with automatic transmission - in dynamic mode, they only happen at higher engine speeds, while in reaction to the vehicle in front. comfort mode they take place at lower ones. The steering can also be adapted to the driving situation, from sporty and firm to comfortable,

and in connection with the dynamic steering,

between sporty-direct and comfortable-indirect as well. quattro with sport differential distributes the drive force variably to the rear axle to attain a high level of agility and acceleration performance while

adaptive cruise control can also be set to be either more balanced or more spontaneous in relation to acceleration behaviour and as a

Others are working in the background.

Most road accidents are caused by human error. In many cases, the results of accidents can be reduced by modern assistance systems. Audi puts various different technologies to work to help you reach your destination safely. The assistance systems work closely together, which increases their versatility and performance – and makes your trip more comfortable at the same time.

tects vehicles ahead by means of a radar sensor. Within systravelling at speeds from about 60 to 250 km/h for instance tem limits, the vehicle brakes and accelerates automatically, by applying a gentle corrective steering movement. There are keeping the distance set by the driver to the traffic ahead two respective system settings for you to choose from in the

adaptive cruise control*: The automatic distance control de-MMI (steering point early or late).

Audi side assist*: The lane change assistant helps you to change lanes. From a speed of about 30 km/h, it monitors the area alongside and behind the vehicle. Radar sensors at the rear detect any vehicles that may be in the blind spot or approaching quickly from behind. If Audi side assist deems that a detected vehicle will compromise a lane change, it signals this by means of an LED display on the corresponding exterior mirror.

> Please note: The systems can only work within system limits. They can be of assistance, but drivers are still required to be attentive at all times.

* Optional equipment.

86 Equipment

It is the equipment that turns an Audi into your Audi.

Audi exclusive

Exclusivity does not know the meaning of the word compromise. But it is familiar with endless variety.

Each year Audi sells over a million vehicles. Yet they only sell yours once. How is that possible? With Audi exclusive. This makes your Audi unmistakeable.

Combine selected décors, coloured leather and a customised paint finish from the large selection of colours available from Audi exclusive to suit your personal wishes. Your unique vehicle will be the result.

Find out more about this topic from your Audi partner and in the Audi exclusive studio in Neckarsulm.

Fine Nappa leather, chestnut brown

S sport seats, fro

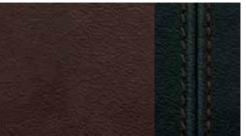

with electric adjustment for seat height, fore/aft position, seat cushion angle, backrest angle; manual adjustment for belt height; with shaped seat side bolsters for better lateral support when cornering, extendable thigh support and electric 4-way lumbar support; with integrated head restraints; for A5 Sportback with S line sport package includes S line embossing on the front-seat backrests.

(The image shows S sport seat, front in fine Nappa leather, magma red/black with contrasting stitching.)

Leather upholstery and trim

Fine Nappa leather, black with black stitching

Fine Nappa leather, chestnut brown/black with contrasting stitching

Fine Nappa leather, black with contrasting stitching

Fine Nappa leather, magma red/black with contrasting stitching

Fine Nappa leather, lunar silver/black with contrasting stitching

Audi exclusive leather upholstery and trim From quattro GmbH

The model-specific standard and optional equipment can be found in the index from page 80 onwards.

58 Seats/seat upholstery, cloth/leather upholstery and trim, headlinings

Climate-controlled comfort seats, front

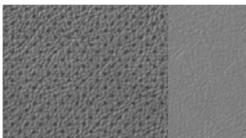

exclusive seat option with shaped seat side bolsters and soft-feel design for luxurious comfort; seat and backrest centre panels; actively ventilated and heated, automatic heating to prevent cold seats; perforated leather on the ventilated seat cushions of the front seats and on the non-ventilated seat cushions of both outer rear seats. (The image shows climate-controlled comfort seat, front, in perforated Milano leather, chestnut brown.)

Leather upholstery and trim

Perforated Milano leather, black

Perforated Milano leather, chestnut brown

Perforated Milano leather, titanium grey

Perforated Milano leather, velvet beige with moor brown or black interior equipment

Audi exclusive leather upholstery and trim From quattro GmbH

The model-specific standard and optional equipment can be found in the index from page 80 onwards.

Cloth/leather upholstery and trim

Arcade cloth upholstery and trim

seat centre panels in arcade cloth, seat side bolsters, head restraints, front centre armrest (if ordered) and door trim inserts in single-colour cloth

Atrium cloth upholstery and trim

seat centre panels in atrium cloth, seat side bolsters, head restraints, front centre armrest (if ordered), door trim inserts and thigh support in single-colour cloth

Alcantara/leather combination

seat centre panels and door trim inserts in Alcantara, seat side bolsters, head restraint centre panels and front centre armrest (if ordered) in leather; for A5 Sportback with S line sport package includes S line embossing on the front-seat backrests

Milano leather upholstery and trim

seat centre panels, seat side bolsters, head restraint centre panels and front centre armrest (if ordered) in Milano leather

Perforated Milano leather upholstery and trim

seat centre panels of the front seats and non-ventilated seat centre panels of the two outer rear seats in perforated Milano leather, seat side bolsters, centre rear seat and head restraint centre panels in Milano leather

Fine Nappa leather upholstery and trim

seat centre panels, seat side bolsters, head restraints, front centre armrest (if ordered), door trim inserts and door armrests in fine Nappa leather; for A5 Sportback with S line sport package includes S line embossing on the front-seat backrests

Audi exclusive leather upholstery and trim (package 1)

seat side bolsters, head restraints, door armrests and front centre armrest (if ordered) in Valcona leather, seat centre panels and door trim inserts in Alcantara. Individ- Headlining in black cloth ual choice of colour for the leather, Alcantara and decorative stitching from the range of Audi exclusive colours. (Can only be ordered in conjunction with sport seats, front and S sport seats, front.) From quattro GmbH

in Alcantara/Valcona leather

Audi exclusive leather upholstery and trim (package 1) in Valcona leather

seat upholstery, head restraints, door trim inserts. door armrests and front centre armrest (if ordered) in Valcona leather. Individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours. From quattro GmbH

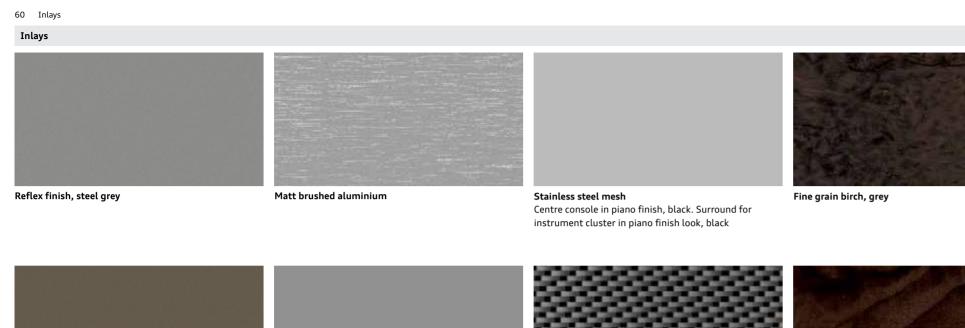

Audi exclusive leather upholstery and trim (package 2) in Valcona leather

leather-covered in addition to package 1: backrest covers. Individual choice of colour for the leather and the decorative stitching from the range of Audi exclusive colours. Attachments are matched to the colour of the leather. From quattro GmbH

Headlinings

Headlining in cloth

depending on the colour selected for interior trim; for A5 Sportback in lunar silver or pashmina beige

Aluminium Trigon

Carbon Atlas

Walnut, dark brown

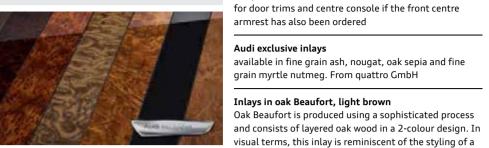

Inlays

Oak Beaufort, light brown

Audi exclusive inlays
From quattro GmbH

Inlays in aluminium/Beaufort, black

Aluminium/Beaufort is produced using a sophisticated process and consists of aluminium layered with blackened wood. This unusual combination of materials unites natural elements with dynamism.

From quattro GmbH

Piano finish, black

Instrument cluster surround in piano finish look, black. From quattro GmbH

Liahts

eadlights

halogen headlights utilising free-form technology with clear glass covers, electric headlight range control and parking light function, daytime running lights with separate reflectors

adaptive light

comprising a dynamic cornering light and static turning light; the dynamic cornering light determines the course of the road from the movement of the steering wheel and variably illuminates corners by swivelling the xenon headlights. It is operational between speeds of approx. 10 km/h and 110 km/h. The static turning light switches on automatically when the indicator has been engaged for a while at low vehicle speeds and illuminates the new direction in which the vehicle is driving.

Daytime running lights

for xenon plus, daytime running light strip in homogeneous LED technology with low power consumption, integrated into the headlights; with separate reflectors for A5 Sportback

Xenon plus

headlights utilising durable gas discharge technology for dipped and high beam ensure intensive illumination of the road and provide good uniformity and range. The automatic dynamic headlight range control reduces the risk of oncoming traffic being dazzled. The homogeneous daytime running light strip uses LED technology and has low power consumption; includes headlight cleaning system

Headlight cleaning system

uses water and high pressure for improved illumination and good visibility due to reduced scatter

High-beam assist

the headlights of oncoming traffic, the rear lights of other road users and built-up areas. Depending on the traffic situation, the high beam is automatically switched on or off. The system thereby improves the driver's visibility and ensures a more relaxed drive thanks to the extra comfort and convenience; includes light/rain sensor

working within system limits, automatically detects

LED rear lights

LED brake, rear, indicator, rear fog and rear number plate lights; low power consumption

Rear lights

in red, reversing lights in white, integrated rear fog lights; LED rear number plate lights

Interior lighting

front and rear, including reading lights at front; with delayed switch-off and contact switches on all doors; reflected lighting for centre console and vanity mirror and luggage compartment lighting; courtesy lighting in the tailgate

Lighting package

anti-glare lighting for the passenger compartment using energy-saving, durable LED technology; comprising: footwell lighting and illuminated inside door handles and vent controls; bulb lighting for: glove compartment, entrance lighting, reading lights at rear, active door reflectors

Front fog lights

integrated in the bumper, for improved illumination of the road in poor visibility

Light/rain sensor

for controlling the automatic headlights and the automatic wiper function; includes coming home/ leaving home function: delayed switching-off/ automatic switching-on of the front fog lights, rear and number plate lights and, in conjunction with xenon plus, the LED daytime running lights, when parking/opening the vehicle; includes windscreen with grey strip along the top edge

Mirrors

Exterior mirrors with integrated LED indicator

electrically adjustable, convex, flat or ashperical mirror glass, housing painted in body colour

also optionally:

heated

including heated windscreen washer jets

heated and electrically folding

including heated windscreen washer jets and automatic kerb-side function for the exterior mirror on the passenger side

heated and electrically folding, automatically dimming on both sides

including heated windscreen washer jets and automatic kerb-side function for the exterior mirror on the passenger side

heated and electrically folding, automatically dimming on both sides with memory function

including heated windscreen washer jets and automatic kerb-side function for the exterior mirror on the passenger side, exterior mirrors also with memory function

The automatic kerb-side function tilts the mirror on the passenger side downwards when reverse gear is engaged, giving the driver an optimum view of the kerb.

Interior mirror

dimming optionally:

-

automatically dimming

including windscreen with grey strip and acoustic glazing for improved windscreen insulation and reduced noise from outside; with light/rain sensor

Roof system

Slide-and-tilt glass sunroof

electric, made from tinted single-glazed safety glass, with infinitely adjustable sun screen; integrated wind deflector, convenience closing/opening from outside with the vehicle key

Closing systems

Electronic immobiliser

integrated in the engine control unit, automatically activated by the vehicle key

Anti-theft alarm

including interior monitoring system and tow-away protection via angle of inclination sensors, can be switched off; signal horn for monitoring doors, bonnet and tailgate, independent of vehicle electrical system

Preparation for tracking system

preparation for connecting a tracking system (available from Audi Genuine Accessories) that enables a stolen vehicle to be located

Garage door opener (HomeLink)

programmable radio-operated remote control, control buttons integrated in the interior lighting module; can be used to open many garage doors and exterior gates; control of safety and lighting systems possible; in conjunction with MMI navigation plus with programming assistance provided by the MMI and setup assistance from appropriate logbook information on the screen. (For information on compatible handheld transmitters, please contact your Audi partner or visit www.eurohomelink.com.)

Closing systems

Convenience key

access and authorisation system; the key only needs to be carried with you; the engine is started and switched off via the engine start-stop button on the centre console, the vehicle is locked and unlocked from outside via sensors on all door handles. The luggage compartment lid can also be opened when the vehicle is locked

Remote control key

opens and locks doors, luggage compartment lid and tank flap; includes convenience closing/opening function for windows;

Ignition lock

electronic, vehicle key features integrated chip, automatically stores relevant vehicle service data (mileage, chassis number and much more)

Glazing

Heat-insulating glass

green tinted, windscreen made of laminated glass; heated rear window with timer switch

Dark-tinted windows (privacy glazing)

dark-tinted rear window and rear side windows

Sun visors

for driver and front passenger, can be folded and swivelled, includes vanity mirror

Windscreen cleaning system

2-speed operation, 4-speed adjustable intermittent wipe, flick-wipe function, automatic wash/wipe function

Further exterior equipment

Provision for trailer towing hitch

includes preparation of control units and enhanced engine cooling. The trailer towing hitch for retrofitting is available from Audi Genuine Accessories.

Trailer towing hitch

removable and lockable; ball bar and ball head made from forged steel, the 13-pin socket can be swivelled out of sight behind the bumper skirt; when removed, the trailer towing hitch can be stored in the spare wheel well; includes trailer stabilisation system via Electronic Stabilisation Control (ESC)

Sill trims

painted in body colour

High-gloss package

roof frame and window slot trim in anodised aluminium

The model-specific standard and optional equipment can be found in the index from page 80 onwards.

64 Exterior equipment, interior equipment

Further exterior equipment

Audi exclusive black high-gloss package

radiator grille frame in high-gloss black, number plate holder and radiator protective grille in matt black, inserts on radiator protective grille and side air intakes in high-gloss black, roof frame and window slot trim in high-gloss black. From quattro GmbH

Bumpers, body-coloured (S-specific)

front and rear and featuring a sporty, dynamic design, with S rear diffuser and rear blade in aluminium look

Audi Singleframe

radiator grille in high-gloss black

Exhaust tailpipes A5 Sportback:

dual branch design, 1 tailpipe each left and right for 1.8 TFSI, 2.0 TFSI, 3.0 TFSI

Rear spoiler

mounted on the tailgate

Model name/logo

model name (for A5 Sportback also the technology name) on the luggage compartment lid, quattro logo (for quattro models) on the radiator grille, luggage compartment lid and the dashboard on the passenger side; on request the vehicle can also be supplied without the model name and technology name on the rear

Seats/seating comfort

Rear seat system with 3 seats

shaped outer rear seats, visually matched to the front seat, and an additional seating possibility in the centre; three L-shaped rear head restraints with manual height adjustment for improved rearward visibility; rear-seat backrest can be split-folded 40:60 or fully

Front seats, electrically adjustable

electric adjustment for seat height, fore/aft position, seat angle, backrest angle; electric 4-way lumbar support for the front seats

Electrically adjustable front seats with memory function for driver's seat

functions as for electrically adjustable front seats, plus 2 presets for the electrically adjustable driver's seat and the exterior mirrors

4-way lumbar support for the front seats electric, with horizontal and vertical adjustment

Folding rear seat backrest can be split-folded 40:60 or fully

Seat heating, front

heats the seat and backrest centre panels; on leather upholstery and trim and sport seats also heats the seat side bolsters; individually adjustable in several stages for driver and front-passenger seats

Seat heating, front and rear

functions as for seat heating, front, additionally for outer rear seats; individually adjustable

Centre armrest, front

adjustable lengthways; with fold-open storage compartment and two 12V sockets in the centre console

Centre armrest, rear

foldable

Leather-covered armrests in the door trims in fine Nappa leather

1-way lumbar

Head restraints

height adjustable front and rear; integrated head restraints on front S sport seats are not adjustable

ISOFIX child seat mounting for the outer rear seats

standard bracket for the practical fastening of child seats in accordance with ISO standards; compatible child seats can be obtained from your Audi partner.

ISOFIX child seat mounting for the front-passenger seat with passenger airbag deactivation switch

Steering wheels/gear levers/controls

Leather-covered sport steering wheel in 3-spoke design

with full-size airbag, adjustable for height and reach, includes leather gear or selector lever knob, colour-coordinated with the selected interior trim

Audi exclusive leather steering wheel rim

Leather covering of the steering wheel rim available in all Audi exclusive colours; individual choice of colour for stitching in various Audi exclusive colours with specific Audi exclusive seam detail. From quattro GmbH

Steering wheel rim with wooden segments

available in walnut, dark brown in 4-spoke design for leather-covered multifunction steering wheel, optionally with shift paddles. From quattro GmbH

Audi exclusive steering wheel rim with wooden segments

available in Audi exclusive woods in 4-spoke design for leather-covered multifunction steering wheel, optionally with shift paddles. Leather and stitching available in various Audi exclusive colours; stitching on the steering wheel rim with specific Audi exclusive seam detail. From quattro GmbH

Steering wheels/gear levers/controls

Leather-covered multifunction sport steering wheel in 3-spoke design

with full-size airbag, adjustable for height and reach, includes gear or selector lever knob in leather, colour-coordinated with the selected interior trim; for operating available infotainment functions; models with automatic transmission optionally have shift paddles behind the steering wheel for changing gear manually

Audi exclusive leather controls

Leather covering of the steering wheel rim, gear or selector lever knob and gaiter available in all Audi exclusive colours; individual choice of colour for stitching in various Audi exclusive colours; stitching on the steering wheel rim with specific Audi exclusive seam detail. From quattro GmbH

Leather-covered multifunction sport steering wheel in 3-spoke design, flattened at the bottom

as for leather-covered multifunction sport steering wheel in 3-spoke design; additionally flattened at the bottom

Selector lever knob in leather

including selector lever gaiter in leather with decorative stitching in contrasting colour

Gear lever knob in Audi exclusive aluminium for manual transmission. From quattro GmbH

Climate control

Automatic air conditioning

electronically regulates the air temperature, flow rate and distribution; with sunlight-dependent control; manual recirculation mode, air intake control, defroster vents for the windscreen and the side windows, dust and pollen filter, humidity sensor, key-coded settings

3-zone deluxe automatic air conditioning

electronically regulates the air temperature, air flow rate and air distribution; with sunlight-dependent control; separate temperature distribution for driver, front-seat passenger and rear compartment, temperature and air distribution adjustable left and right in the front, front control panel features digital display, control panel in the rear centre console for setting the temperature in the rear compartment; automatic recirculation mode by means of air quality sensor, indirect ventilation, combined/fine particulate filter, rain, light and humidity sensor, keycoded settings

Auxiliary heating/ventilation

The auxiliary heating heats up the interior and frees the windows from ice, the ventilation system supplies fresh air and reduces the interior temperature; complete with timer and separate radio-operated remote control with radio feedback

Luggage securing and storage systems

Storage compartments

in the front and rear door trims with storage for drinks bottles, eyewear compartment in the front interior lighting module, above the interior mirror

Storage package

Storage nets on the backs of the front-seat backrests, storage compartment under the front seats (under the front-passenger seat only if driver's seat has memory function), lockable glove compartment, cup holder in the rear centre armrest

Cup holders

2, integrated into the centre console

Lashing points

4 in the luggage compartment, for securing luggage and other objects, attachment points for the luggage compartment net

Reversible mat

for the luggage compartment, velour on one side, rubber on the other, for covering the entire luggage compartment also when the rear seat backrest is folded down, with fold-out protective cover for the loading sill and bumper

Through-loading facility with removable ski/snow-board bag

removable, secured by a strap, for the practical transportation of long items, e.g. up to 4 pairs of skis or 2 snowboards

Luggage compartment package

Luggage compartment net for securing to lashing points on the luggage compartment floor, bag hooks, net at side, tensioning strap at side, loading sill cover in high-gloss polished stainless steel

Further interior equipment

Floor mats, front

in velour, coordinated with the carpet colour

Floor mats, front and rear

in velour, coordinated with the carpet colour

Audi exclusive floor mats

Individual choice of colour for floor mats and piping from the range of Audi exclusive colours.
From quattro GmbH

Audi exclusive carpet and floor mats

Individual choice of colour for carpets, floor mats and piping from the range of Audi exclusive colours. From quattro GmbH

Door sill trims

with aluminium inlays on the door sills

Window controls

electric front and rear, with safety system to limit closing force, one-touch open/close with convenience function

Cigarette lighter and ashtrays

ashtray in the centre console front and rear, cigarette lighter integrated in the front ashtray

Grab handles

damped action, folding, four handles recessed into the roof, clothes hooks on the rear grab handles

12V socket

in the side trim of the luggage compartment on the right-hand side at the rear

230V socket

in the centre console in the rear; replaces the 12V socket

Aluminium look in the interior

on light switch, air conditioning, MMI rotary/ push-button control, vents, mirror adjustment switch, window controls and around the gear or selector lever gaiter

MMI® and navigation systems

MMI® navigation plus

- with navigation data (hard drive)¹
- high-resolution 7-inch colour display with highquality map representation and topographical map colouring, speed limit display based on navigation data and display of sightseeing information and 3D city models, choice of 3 alternative routes, scrolling along the route
- rotary/push-button control with integrated joystick function for map searches
- split-screen route information (manoeuvring points, points of interest on motorways, TMCpro on route), detailed junction map and lane recommendations, dynamic route guidance with TMCpro (where available)
- voice control system (destination entry by means of whole word input in a sentence)
- read-aloud function for TMCpro reports
- additional arrow display in the driver information system with colour display
- · radio with triple tuner and phase diversity
- hard drive can also be used to store music (20 GB)
- MP3, WMA, AAC and MPEG-4 compatible DVD player can also be used for music and video DVDs
- 2 SDHC card readers (for up to 32 GB)
- AUX-IN connection
- 8 passive loudspeakers, total output 80 watts
 In conjunction with Audi connect including car phone,
 it is possible to use services supported by Audi
 connect, such as navigation using Google Earth™
 mapping service² and Google Street View™², weather,
 news and online traffic information

MMI® and navigation systems

MMI® navigation

- with navigation data (DVD)¹
- 6.5-inch colour display with high-quality map representation and numerous detailed display options
- $\boldsymbol{\cdot}$ dynamic route guidance with TMC (where available)
- voice control (destination entry via spelling)
- additional arrow display in the driver information system
- radio with triple tuner and phase diversity
- MP3 and WMA-compatible DVD player for navigation data (DVD), can also be used for music CDs
- 2 SDHC memory card readers (for up to 32 GB)
- AUX-IN connection
- 8 passive loudspeakers, total output 80 watts

Driver information system

A monochrome display provides you with information from the trip computer, auto check system, scope of display of the MMI system, brake wear indicator at front, clock and digital speed display; the outside temperature display shows an ice crystal at temperatures under +5 °C to warn of possible black ice. The display is also used to indicate the recommended gear in vehicles with manual transmission and on models with automatic transmission when in manual mode. The integrated efficiency program assists you with consumption data overviews, display of additional loads and fuel-saving tips for more economic driving; including attention assist

Driver information system with colour display

functions as for driver information system, plus high resolution colour display and a larger gear display

Attention assist

part of the driver information system; the attention assist analyses driving behaviour using a range of sensors. Steering movements and pedal actuation are recorded, for example, and compared with the individual driving patterns of the respective driver. If the evaluation indicates that the driver's attention is lapsing, the system recommends a break by means of a display in the driver information system and an acoustic signal. The system is active between 65 km/h and 200 km/h and can be deactivated.

Radio and TV systems

chorus radio

MMI operating concept with 6.5-inch monochrome display, CD player, 30-station memory with dynamic station list, FM (VHF) and AM (MW, LW) reception; phase diversity, speed-dependent volume control, 8 passive loudspeakers, total output 80 watts; note: certain car menu settings cannot be adjusted using the chorus radio

Digital Audio Broadcasting

In addition to the range of analogue stations, programmes from digitally broadcast radio transmitters with better sound quality can be received according to DAB standard, including DAB+. Display of additional information accompanying the programme (e.g. artist, title, cover) in the form of a slide show and other programme-independent data services (e.g. weather, traffic, news). In connection with MMI navigation or MMI navigation plus also reception of DMB audio; a 2nd DAB tuner permanently searches for alternative reception frequencies of the set radio station, at the same time the station list is updated. Please note: reception depends on local digital network availability; contents and scope of the additional information depend on provision by the respective radio station.

concert radio

functions as for chorus radio; plus 6.5-inch colour display, SDHC card reader (up to 32 GB), both MP3, AAC and WMA compatible, TP memo function and AUX-IN connection

Digital TV reception

Reception of digitally-broadcast (DVB-T), uncoded television stations (MPEG-2 or MPEG-4 standard), DVB-T audio stations, teletext and Electronic Programme Guide (EPG). External AV-IN connection via adapter cable (available through Audi Genuine Accessories). Please note: TV reception depends on digital network availability; no picture possible when the vehicle is moving

The model-specific standard and optional equipment can be found in the Google and the Google logo are registered trademarks of Google Inc.

Radio and TV systems

symphony radio

functions as for concert radio, plus 6-disc CD changer

Audi sound system

6-channel amplifier, 10 speakers including centre speaker in the dashboard and subwoofer in the spare wheel well, total output 180 watts

CD changer

in the glove compartment, for 6 CDs (MP3 and WMA compatible), shock-resistant, easily accessible, each CD can be loaded and changed individually. Music files with digital rights management (DRM) cannot be played.

Audi music interface

for the connection of portable media players such as Apple iPods from generation 4, Apple iPhone (music functionality) as well as USB storage media and MP3 players. The Audi music interface is located in the glove compartment and operated via the MMI or radio control panel or a leather-covered multifunction steering wheel. Please note: can only be used in conjunction with a special adapter cable (Audi Genuine Accessories). Please contact your Audi partner or visit www.audi.com/mp3 for information on compatible media players. (If ordering the Audi music interface, the separate AUX-IN connection is omitted.)

Adapter cable set for Audi music interface

consisting of 2 connection cables for the connection of iPod/iPhone and data carriers/media players with USB connection (Type A): further adapter cables available from Audi Genuine Accessories: visit www. audi.com/mp3 for information on compatibility

Adapter cable set plus for Audi music interface

In addition to the adapter cable set for Audi music interface, it is possible to display cover art and video functions in conjunction with iPhones and the more recent iPod generations; depends on device used; for information on compatibility, visit www.audi.com/mp3

Bang & Olufsen Sound System

surround sound reproduction with 14 loudspeakers including centre speaker in the dashboard and subwoofer in the spare wheel well; 10-channel amplifier with a total output of 505 watts; exclusive speaker covers with aluminium trim; dynamic driving noise compensation. The reproduction of 5.1 Surround Sound is possible in conjunction with MMI navigation plus and the integrated DVD drive.

Telephone and communication

Bluetooth interface

Bluetooth-compatible mobile phones can be connected to the vehicle via the interface: hands-free calls are possible in the vehicle via the microphone; please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones.

Preparation for mobile phone (Bluetooth)

comprises a hands-free facility, voice control for the telephone functions as well as a fitting for an optional mobilespecific charger in the front centre console; includes connection to the vehicle aerial to reduce SAR radiation inside the vehicle and improve reception quality; operated via the navigation systems, concert radio, symphony radio or a multifunction steering wheel (if fitted); please contact your Audi partner or visit www.audi.com/bluetooth for adapters and information about which mobile phones are compatible.

Bluetooth car phone

your Bluetooth-capable mobile phone can be conveniently connected to the vehicle's internal UMTS module (provided the mobile phone supports SIM Access Profile); additional SIM card reader in the surround of MMI navigation; transfer of phone book entries to the vehicle and management of call lists; operated via the navigation system or a multifunction steering wheel (if fitted); for information on compatible mobile phones, please contact your Audi partner or visit www.audi.com/bluetooth.

Telephone and communication

Handset at front for car phone

with colour display and integrated SIM card reader. for private phone calls; easy writing of text messages thanks to automatic word recognition; handset is stored in the front centre armrest

Audi connect including car phone

convenient connection of your vehicle to the internet. Use of the services supported by Audi connect is possible only with the optional MMI navigation plus equipment and with the data module integrated in Audi connect including car phone.

You also require a SIM card with a data option - for car phone a SIM card with phone and data option or a Bluetooth-capable smartphone with remote SIM Access Profile (rSAP). There is a reader for your SIM card in the surround of the MMI navigation plus.

The following **services** supported by **Audi connect** are available in your model:

Mobility & navigation

- · Point-of-interest (POI) search with voice control
- Traffic information online
- Navigation with Google Earth™ map service* and Google Street View™*
- Destination entry via myAudi or Google Maps™*
- Fuel prices
- · Parking information
- Country information

Communication

 Wi-Fi hotspot nfotainment

- Weather
- Audi music stream
- News online
- City events
- Travel information

The services are available only with an existing or separate mobile phone contract and only within the range of the respective mobile phone network. Additional costs may be incurred when receiving data packets from the internet, depending on the terms of your mobile phone contract, particularly when used abroad. Because of the high data volumes involved, a data flat rate is strongly recommended.

The availability of the services supported by Audi connect varies from country to country. The services are provided for at least one year from vehicle delivery. The traffic information online service requires initial activation in the vehicle. From that point onwards, this service is subject to a 36-month usage limit (in as far as activation takes place within 6 months of vehicle delivery; otherwise corresponding shortening of the usage rights).

Your Audi partner will be happy to inform you about how to extend the service and the costs this incurs. Please visit www.audi.com/connect or contact your Audi partner for more detailed information about Audi connect; contact your mobile services provider for information about contract conditions.

Assistance systems

Audi side assist

lane change assistant, working within system limits at speeds of 30 km/h and above, the system uses radar technology to monitor the area on the left, right and behind the moving vehicle and informs or warns the driver by means of an LED display in the respective exterior mirror if the Audi side assist deems that a detected vehicle will compromise a lane change

adaptive cruise control

automatic distance control function (control range: 30-200 km/h); working within system limits, it uses a radar sensor to detect vehicles ahead and maintain this distance by automatic braking and accelerating; 4 distance levels and different driving modes can be selected individually; including Audi pre sense front: Audi braking guard warns the driver about a detected imminent collision with the vehicle in front through an extended braking assist feature; extended by the function of maximum deceleration: this is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to avoid this collision if possible.

Parking system plus with reversing camera

acoustic and visual parking system for front and rear. image of area behind the vehicle shown on the MMI display, with dynamic display elements showing the calculated path (steer-angle dependent); includes help lines and guidelines and identification of point at which to apply opposite lock when parallel parking, reversing camera integrated discreetly in the handle strip of the tailgate.

Parking system plus

acoustic and visual park assist system for the front and rear with MMI screen display; measurement is by ultrasonic sensors concealed in the bumpers

Parking system, rear

makes reverse parking easier within system limits by indicating acoustically how far away the vehicle is from an object detected behind the vehicle; measurement is by ultrasonic sensors integrated discreetly in the bumper

The model-specific standard and optional equipment can be found in the index from page 80 onwards.

^{*}Google and the Google logo are registered trademarks of Google Inc.

Assistance systems

Audi active lane assist

lane compliance assistant, supports the driver within system limits comfortably in keeping in the lane (operating range from approx. 60 km/h to 250 km/h). If the system is activated and ready and the driver has not operated the indicators, the Audi active lane assist will guide the vehicle within recognised lane boundary lines by means of gentle corrective steering intervention; the driver can choose whether to be monitored continuously or just shortly before crossing the traffic lane marker (choice of earlier or later steering time); additional steering vibration can be adjusted if the driver wishes

Assistance package

The assistance package contains the functions of the following assistance systems: parking system plus (option to upgrade to parking system plus with rearview camera), Audi active lane assist and adaptive cruise control

Hold assist

holds the vehicle stationary for unlimited periods after stopping on normal uphill and downhill gradients. The system is activated by push-button and allows the driver to drive away easily and comfortably.

cruise control

at speeds of 30 km/h and above, the system keeps the set speed constant, provided that engine power and engine braking effect permit it; also features active braking intervention, e.g. when driving downhill; operated via separate steering column stalk; set speed displayed in the driver information system

Suspensions/brakes

Audi drive select

changes vehicle characteristics e.g. by adapting power steering assistance, accelerator and gearshift characteristics. In addition the system influences other optional equipment; available modes: comfort, auto, dynamic, efficiency and – in conjunction with an MMI navigation system – individual. The efficiency mode shifts the engine, automatic transmission, climate control and optional adaptive cruise control or cruise control in a consumption-improved basic setting.

Electromechanical parking brake

includes parking brake function when stationary, drive-off assistance function through automatic release when driving away and emergency braking function whilst driving acting on all 4 wheels

Suspension with damper control

driving situations; damper characteristics can be adjusted to a dynamic or comfort-oriented setting via

electronically controlled adaptation to different

Dynamic suspension

Audi drive select

providing outstanding handling and exceptional ride comfort; 5-link lightweight front axle, tubular cross stabiliser, trapezoidal-link rear axle with independent suspension; twin-tube gas-filled shock absorbers and coil springs, front axle carrier rigidly fixed to the body, flexibly mounted axle supports at rear

Sport suspension

with stiffer spring and damper tuning for more direct contact with the road and sporty handling

S line sport suspension

with more dynamic suspension tuning and vehicle lowered by a further 10 mm when compared with the dynamic suspension and the sport suspension

S sport suspension

with stiffer spring and damper tuning for more direct contact with the road and sporty handling; 5-link lightweight front axle, tubular cross stabiliser, trapezoidal-link rear axle with independent suspension; twin-tube gas-filled shock absorbers and coil springs, front axle carrier rigidly fixed to the body, flexibly mounted axle supports at rear

Brake system

dual-circuit brake system with diagonally-split brake system, Antilock Brake System (ABS) with Electronic Brake Force Distribution (EBD), Electronic Stabilisation Control (ESC) with brake assist, tandem brake booster, disc brakes at the front/rear, ventilated at the front

Brake callipers

painted in black

Technology/safety

Body, galvanised

fully-galvanised in areas at risk from corrosion; unitary construction, welded to the floor pan, front and rear areas feature defined crumple zones; (12 year guarantee against rust perforation)

Airbags

full-size airbags for driver and front-seat passenger; including passenger airbag deactivation switch if ISOFIX child seat mounting for the front-passenger seat is fitted

Side airbags, front and head airbag system

front side airbags integrated into the seat backrests; with additional head airbag system which deploys over the side windows to protect the front and outer rear passengers in the event of a side impact

Technology/safety

Side airbags, rear

to supplement the side airbags, front and head airbag system

Integrated head restraint system

In the event of a rear-end collision, the design of the front seats is better able to restrain the upper torso and provides improved support for the head when compared with conventional systems; this increases the level of protection and reduces the risk of a whiplash injury.

Seat belts

automatic 3-point belts for all seats, with belt force limiters, seat belt tensioners and seat belt reminder at the front; colour-coordinated with the interior

Instrument cluster

with adjustable lighting, electronic speedometer with odometer and trip odometer, rev counter and automatic ready-check when engine starts, radio-controlled clock (GPS clock in conjunction with MMI navigation plus), coolant temperature display and fuel gauge

Safety steering column

includes a shunt mechanism with damping function to supplement the protection offered by the seat belts and airbags

First-aid kit

in storage compartment of the rear centre armrest $% \left(t\right) =\left(t\right) \left(t\right) \left($

Warning triangle

with bracket on the inside of the luggage compartment lid

Anti-Slip Regulation (ASR)

for good traction, reduces spinning of the drive wheels

Technology/safety

Electronic Differential Lock (EDL)

On surfaces with varying levels of grip, this start-off assistant automatically brakes the drive wheels on any surface that is too slippery, thereby ensuring smooth, powerful progress; operates at speeds up to approx. 100 km/h.

Electronic Stabilisation Control (ESC)

networks the ABS, EBD, ASR and EDL with its own sensors and compares the driving data with reference data; provides better stability at all speeds by targeted braking of individual wheels and intervention in the engine management system

ESC with electronic axle-differential lock

The electronic axle-differential lock function is integrated in the ESC on front-wheel drive models. It distributes the drive torque by means of targeted braking actions, depending on the driving situation. When cornering, the axle-differential lock actively counteracts understeer. The result is improved traction and dynamic performance when cornering and more precise and neutral handling (less understeer). Agility during steering is also improved.

Electromechanical power steering

maintenance-free rack & pinion steering with speeddependent power steering; precise steering feel at high speeds, excellent assistance when parking

Dynamic steering

When changing lanes, parking and cornering, this system improves comfort and handling by dynamically regulating steering according to the driving situation. In addition to adaptation of the steering effort (as with the electromechanical power steering), the steering angle is also adapted (steering ratio). The system is also supported further by vehicle stabilisation through ESC.

6-speed manual transmission

all-synchromesh, hydraulically-actuated dry clutch with asbestos-free linings, 2-mass flywheel

multitronic®

the multitronic generation of continuously variable transmissions, featuring dynamic gear control program (DCP) and sport program; 8 different gears can be selected in manual mode; hydraulically controlled multi-plate clutch

S tronic®

The 7-speed dual-clutch transmission with electrohydraulic actuation facilitates shorter gearshift times and gearshifting with hardly any perceptible break in propulsive power; can be operated via the shift paddles behind the steering wheel (optional) or the selector lever; in automatic mode the driver can choose between 2 programs:

D (normal) and S (sport)

Front-wheel drive

Electronic Differential Lock (EDL) through intervention of the braking system on all driven wheels; Anti-Slip Regulation (ASR); Electronic Stabilisation Control (ESC) with brake assist

quattro®

permanent all-wheel drive with asymmetric/dynamic torque distribution, self-locking centre differential with wheel-selective torque distribution, distributes the drive forces depending on the driving situation to each individual wheel for precisely controlled handling

quattro® with sport differential

The electronically controlled sport differential distributes variable amounts of drive force to each rear wheel and ensures outstanding acceleration performance in corners and stabilises the vehicle's response to load change; it also improves direct steering characteristics and provides more agile handling due to the lower steering effort required.

Start-stop system

helps to reduce fuel consumption and CO_2 emissions by switching off the engine in stationary phases, e.g. at traffic lights. The start process is initiated as soon as the clutch is depressed or the foot brake is released for moving off. May be deactivated using a switch at any time.

Recuperation

Increasing the generator voltage converts kinetic energy into usable electrical energy when the vehicle is coasting or braking. This energy is used to assist the generator during subsequent acceleration, saving up to 3 % fuel.

The model-specific standard and optional equipment can be found in the index from page 80 onwards.

Audi Genuine Accessories: your decision in favour of more individuality.

Have you been able to decide between different engines of these excellent vehicles? No matter which of them you will be driving in the near future – they already have their quite distinctive style. They're just missing one little thing: your personality. The following pages will show you a few of the options available for turning your Audi into the car that meets your requirements. Audi Genuine Accessories are made to match the respective model in design and functionality, enabling you to add your own very personal touches.

Detailed information can be obtained from the Audi A5 accessories catalogue, at www.audi.com and from your Audi partner.

74 Audi Genuine Accessories

1 Cycle fork mount

Convenient. Lockable. Suitable for cycles with a quickaction lock on the front wheel. Maximum load 17 kg. (Can only be used in conjunction with the carrier unit.)

2 Audi tracking system plus¹

Enables location and tracking of a stolen vehicle via GPS/GSM technology in 27 European countries. With automatic driver recognition and intelligent restart inhibitor.

3 Audi Entertainment mobile²

The Rear Seat Entertainment of the second generation is a 9-inch screen with integrated DVD player for installation on the front-seat backrests. Excellent image easy to clean. Its aerodynamic form helps to reduce quality thanks to digital high-resolution screen, high functionality and numerous connection options, e.g. the must be observed. (Can only be used in conjunction with The seat offers excellent comfort thanks to intelligent separately available Bluetooth headset. With the new holder for mobile end devices, it is easy to attach and can also be used outside the vehicle.

4 Luggage box (370 l)

The compact box is suitable for the secure storage of your luggage. It is easy to open, can be locked and is wind noise better. Maximum permissible load of 50 kg the carrier unit.)

5 Cast aluminium winter wheels in 5-arm design

Complete winter wheels in size 7.5 J x 17 with 225/50 R 17 tyres³, can be fitted with snow chains. You can find further wheels in different designs, including summer wheels, in the special accessories catalogue.

6 Snow chains

For improved grip on snow and ice. To fit wheel size 225/50 R 17, for example.

7 Audi child seat youngster plus

belt guidance. The backrest is adjustable in height and width. Adaptations can be made via a viewing window for size adjustment. The removable washable cover is made from a breathable fabric which is kind to the skin and is certified to Oeko-Tex® standard 100; available in misano red/black and titanium grey/black. Suitable for children from 15 to 36 kg (approximately 4 to 12 years).

¹ For more detailed information, please contact your Audi partner. ² Condition: fitting for Rear Seat Entertainment in the vehicle. Only available from Audi Genuine Accessories.

³You will find specifications on the technical characteristics of tyres on page 78

Explanation of 1 to 11 on page 78.

76 Technical data

Notes

- The figure stated was calculated using the specified measuring procedure (current version of Directive 80/1269/EEC).
- ² You will find specifications on the technical characteristics of tyres in the adjacent table.
- Unladen vehicle weight includes driver (68 kg), 7 kg of luggage and fuel tank 90 % full, calculated in accordance with the current version of EC Directive 92/21/EEC. Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.
- 4 The engine's power output always decreases with increasing altitude. At 1,000 m above sea level, and for every additional 1,000 m, deduct 10 % from the weight of the outfit (trailer load limit + gross weight of the towing vehicle). Figure for trailer load limit applies to factory-fitted trailer towing hitch. If using the vehicle with a trailer towing hitch for commercial purposes, a digital tachograph may be required under certain conditions.
- 5 A vehicle's fuel consumption and CO₂ emissions do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. CO₂ is the greenhouse gas primarily responsible for global warming.
- 6 Regulated.
- We recommend using sulphur-free super unleaded RON 95 in accordance with DIN EN 228. If not available, use sulphur-free regular unleaded RON 91 in accordance with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel in accordance with 692/2008/EC.
- 8 The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.
- ⁹ Model with limited range for optional equipment.

Important note

Inspections are due as shown by the service display.

78 Technical data, dimensions

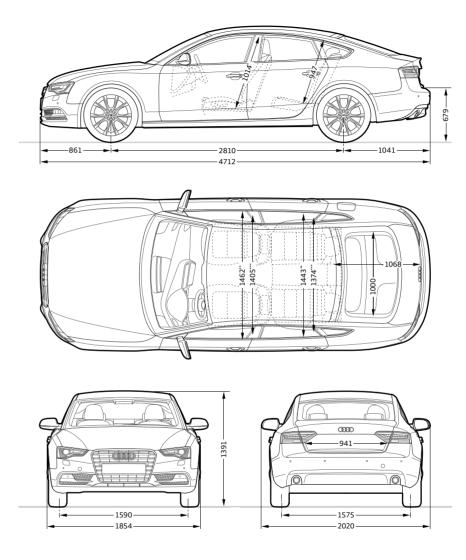

Classifications of tyre parameters

The table shows the range of fuel efficiency, wet grip and exterior noise emission classes for the different tyre sizes of the Audi AS Sportback.

Tyre size	Fuel efficiency class	Wet grip class		or noise on class

Discover the world of Audi.

Responsibility

Living up to our responsibilities is a principle that is firmly anchored in Audi strategy. Alongside commercial gradually becomes CO₂-neutral is another aspect of our success and international competitiveness, our responsiis a key consideration, as is protecting the environment gy and social projects. At Audi, sustainability is closely and conserving resources. And what is true in the details linked with how we see the future: the Audi Urban - our catalogues are printed on FSC-certified paper - Future Initiative sees Audi working with international also holds in general: Audi develops cars that are not only sporty and emotive but also ever more efficient. In the and trends in mobility. long run, Audi wants its products to allow CO₂-neutral

mobility. Seeing to it that production in Audi plants bility toward company employees and society as a whole society – particularly in the fields of education, technolo-

Choosing an Audi means choosing a brand that offers more. More individuality. More exclusivity. More fascination.

The Audi experience

The fascination of Audi can be experienced in many difdigital access to all models at their actual size and in the major motor shows. This is where Audi always presents its new models and invites you to take a look at in the "Vorsprung durch Technik" online special at www. your driving skills. audi.com. But a look back can also be rewarding: at the

Audi mobile museum in Ingolstadt, history and highferent ways. Audi City in London, for example, gives you tech go hand in hand. A total of 130 historic exhibits and state-of-the-art forms of presentation make for a real time. And of course it is always worth visiting one of thrilling symbiosis. Plus, Audi driving experience allows you to live the excitement and countless possibilities of current Audi models. Here, pure driving enjoyment is how the future is being shaped with "Vorsprung durch" combined with valuable learning effects. This is ensured Technik". Anyone interested in seeing how Audi is alreaby a team of specially trained and highly qualified instdy putting this into practice will find fascinating insight ructors who provide practical tips to help you optimise

Team spirit

Motorsport is a driving force behind the brand. For years events for many years. In the world of winter sports, for Audi has been among the champions in various racing series, for instance the 24 Hours of Le Mans or the DTM Ski Association (DSV) for almost three decades and German Touring Car Masters. The values that are crucial has also partnered 14 other national alpine teams. In in many different areas of sports are also central ones for Audi: precision, passion and technology. No coincidence then that Audi has been sponsoring sporting

example, Audi has been the main sponsor of the German football, we support national and international teams. And Audi is also a partner for the German Olympic Sports Confederation.
